

STEVE NOUTCHA

Self-learning report

14/10/2013

goals :

To discover different methods to learn English (vocabulary and grammar)

To develop new way to organize my time and work: to improve this skill.

To practice English each day with everybody (family, website, movies)

activities :

- I Worked on the TOEIC theme, *Chap2 :The telephone*. (from the book « nouveau TOEIC , lin Loughed)

- I worked my vocabulary on the environment topic on the website *englishtown.fr* .

This website is very interesting. For example I choose to work 3/5 hour per week on this website.

And it proposes to me a little plan and the time remained to do my work.

This website allows me to improve my organization and see my progress

- Third activity is the practice of the English daily. I speak English by message or oral conversation with somebody (family and friends).

And in the same time, I try to organize my trip to USA and Amsterdam.

Evaluation

In these different activities, the most difficult is always the oral comprehension. The site Englishtown proposes this activities and I think that it is good opportunity for me. I would try to do that and I see the results for the next weeks.

In other part, the TOEIC book I learn different lessons but I think that my pace is very slow because I don't learn many lesson as I would like.

The good activities is mw trip to USA , i organized my trip, and I found cities I visit (Washington, New York and Atlanta) But I need to define the order and times of travel.

Conclusion

The activities were good and i have taken a little pleasure to do that. But I think that now I need to concentrate my attention on 2 points : Organization and creation of my well meshed system.
